Batch migration audit — 120 calls

TOOL CALLS	FAILURES	RETRIES	WALL CLOCK	TOKENS	EST. COST
120 · 5 tools	✕ 4	↻ 4 · 4 chains	5m 22s	1,334,089 in + out	$1.36

the ask

the ask · 2026-11-04 14:46:40

Audit the twelve batch-migration modules: run each test file, read the failing assertion when one breaks, fix it, and record what changed. If a fix does not hold, say so rather than calling the batch green.

timeline

the ask · 2026-11-04 14:46:40

Audit the twelve batch-migration modules: run each test file, read the failing assertion when one breaks, fix it, and record what changed. If a fix does not hold, say so rather than calling the batch green.

> AGENT REPLY · 2026-11-04 14:52:02
>
> Audited all twelve batch modules: 120 calls, four suites failed on the cursor drift and each passed on the retry after the floor fix. No batch was reported green without a passing retry.

reconciliation

cost · sum of per-model rows vs the session total	$1.36 derived / $1.36 recorded · Δ0 ✓
tool calls · rows in the message log vs the session counter	120 derived / 120 recorded · Δ0 ✓

Costs are the figures Hermes recorded at call time, not a price table applied later — Receipts does not re-price a session. The delta above is the artifact's own arithmetic against the session row; a non-zero delta is shown rather than smoothed away. cost status **estimated** · source **official_docs_snapshot** · pricing **2026.11.1**
